

To whom it may concern,

I am writing to recommend Kamran Choudhry for a frontend software developer position within your organization. I have had the pleasure of managing Kamran at Vertex, where he was the very first frontend hire. I collaborated with Kamran to build the Vertex frontend from scratch, and he was instrumental along the entire journey.

Kamran has played a pivotal role in several high-impact projects, showcasing their expertise in frontend development. Notably, they were instrumental in building order & position entry lines on our TradingView Chart integration. He championed a project to revamp parts of our app navigation to make the UI more intuitive to users. Additionally, Kamran played a key role in everyday operational processes, such as running production deploys and managing user bug reports. These are only a few examples of ways that Kamran has contributed to Vertex during his time with us.

I am confident that Kamran will be a great addition to your organization. Kamran brings a blend of technical skill, natural curiosity, and great work ethic. Please feel free to contact me if you require any further information.

Sincerely,  
Frank Jia, Head of Engineering @ Vertex Protocol
